

Talon Pro Firmware Upgrade

1.0.52

Download upgrade file [1.0.52](#) to your desktop

In the Web Interface go to the System tab and select "Update"

Select "Choose File" and browse to your desktop to select the downloaded file.

Select "Upload and Update"

The Talon Pro will update and restart, when finished it should read "Build 1.0.52" in the top right corner of the Web Interface.

Next, it is important to do a reset of the unit to clear out any erroneous data from the previous load.

Use a paper clip or equivalent to press the reset button and hold it until the 6 status LEDs light green individually and start flashing simultaneously, release the reset button at this time. The LEDs will go through a blink cycle and the system will reset.

NOTE: ALL SETTINGS WILL BE LOST WITH THE UPDATE. Prepare accordingly.
